Installation Instructions

Removable Tabs:

Due to the design of the removable tabs, the RangeFinder II tow bar can not be used. Adapters, except the BX8833 and the BX88151, can not be used with this baseplate.

Instructions:

The headlight assembly and front fascia are removed and reinstalled for the baseplate installation. Drilling is required.

The dimensional variations between otherwise identical vehicles can be considerable. While the baseplate was designed for easy installation, it may be necessary to tailor the baseplate slightly to compensate for auto manufacturer's tolerances. These minor adjustments may include filing a hole slightly, bending electrical rods, and/ or bending end plates.

The BX8848 4 - Diode Wiring Kit is recommended for this vehicle.

Installation Instructions

1. Remove the twelve pushpins from the black plastic cover on the top side of the fascia. Lift the cover and set it and the pushpins aside to be reinstalled later.

2. Remove one Phillips screw from the fascia's corner, just above the front tire. Do this to both sides of the vehicle.
